

# Hooper's RTK Network is #1!

Getting the benefits of precision farming is easier than ever - if you can receive a cell signal, Hooper can deliver exceptional RTK accuracy to within 1 inch to your farm. Hooper has exclusive rights to a powerful cell network that includes PA, DE, MD, NJ and parts of VA - a network strong enough to reach areas that are very marginal when it comes to cell signal strength. Hooper's established RTK network, when paired with Trimble AutoPilot systems, has proven to deliver outstanding accuracy, reduce input costs, and increase productivity.

## Advantages of Hooper's RTK Network versus a 450 Radio Network, Starfire 2 and Omnistar

- ✓ 1 Inch Accuracy No Matter How Far You Are From The Base Station
- ✓ Less Componentry Needed (No Need For A Radio)
- ✓ Lower Overall Cost Compared To Competitive Networks
- ✓ High-Speed Wireless Communication
- ✓ Better Signal Retention
- ✓ Repeatability
- ✓ Less Wait Time For Corrections
- ✓ Precision Farming Experience That Dates Back To 1994
- ✓ Factory-Trained Team Of Specialists That Focus Exclusively On Precision Agriculture

## VOICES FROM THE FIELD

### Hooper Customers Using Trimble® Autopilot™ System On RTK

"I didn't have any drift... that was the biggest difference. When I stopped to fill my planter I went back and I was right on my same row, it didn't drift a couple of feet like it would have before."

Jonathan Quinn - Warwick, MD

"The cell phone signal strength has been absolutely fantastic. It doesn't lose its signal, even if I'm up against the woods or when I turn around, it picks up the signal and I'm off and running. With the RTK it's repeatable every time."

Brad Ritter - Lewes, DE

"Trimble technology has been extremely accurate for us. In fact, we've found it to be accurate within half an inch."

James Harper - East New Market, MD

"I've definitely discovered there's a difference in terms of cost savings. You are more productive and you save on fuel and time and trips across the field. Plus you also save on seed."

Rick Eaves - New Midway, MD

**There's A Lot Of Talk About Precision Farming...  
But Hooper And Trimble Are Making It A Productive Reality On Eastern Farms**
